

Amendments to the Claims:

This listing will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A method of preventing defective germination or rosette formation of a plant seed which tends to suffer from defective germination or rosette formation during growth thereof comprising the steps of:

leaving the plant seed to stand in a highly watery condition at a low temperature in a dark ~~place; place for a sufficient period of time to inhibit defective germination or rosette formation of the~~ plant seed, the dark place being sufficiently dark to prevent the plant seed from germinating; and

drying the plant seed immediately after leaving the plant seed to stand in the highly watery condition at the low temperature in a dark place, before the seed becomes active.

Claim 2 (original): The method of claim 1, wherein the plant seed is dried in insufficient light to cause the seed to germinate.

Claim 3 (original): The method of claim 2, wherein the plant seed is dried in a dark place.
